

XMAR TOKEN

The Token That Will Change Crypto Adoption

XT is the cryptocurrency whose function is to offer its users an adoption within blockchain technology and take it to the next step.

Making its use, day in and day out, suitable in the real world.

Our intention is to cover a global market, including Spanish, English, Chinese, etc.

Achieving that with our token they can generate passive profits.

PASSIVE EARNINGS

With each transaction of our token you will receive rewards from it, so for as long as you decide to stay with us, you will see the amount increase.

The more XT you own, the higher the performance.

Rewards

BURN

With each transaction we will implement a mechanism to burn our token.

This will lead us to withdraw XT token from circulation.

Achieving scarcity and higher value to each remaining token.

Achieving a deflationary effect that will benefit our holders.

TOKEN PURCHASE

To buy our tokens, they can do so through any decentralized cryptocurrency exchange protocol (DEX) that feeds on the liquidity injected into UniSwap, such as VoltiChange (Volt Inu), Shushi Swap, 1Inch, etc.

DAO

The intention is to create a Decentralized Autonomous Organization (DAO) to allow users to create and vote on proposals for XT in the general group available on Telegram.

Why do we need DAOs?

Starting an organization with someone who involves funding and money requires a lot of trust in the people you work with. But it's hard to trust someone you've only interacted with on the internet.

With DAOs you don't need to trust anyone else in the group, only the DAO's code, which is 100% transparent and verifiable by anyone.

This opens up many new opportunities for global collaboration and coordination.

XT SWAP

The goal of XT SWAP is to provide a safe place for the community to trade tokens on a decentralized exchange, while also implementing special incentives and rewards for those who contribute to the ecosystem, such as liquidity providers.

Our unique tokenomics, user-friendly design, strong technical foundation, and ever-growing community all contribute to the success of the platform, which will ultimately form the central pillar of the entire ecosystem.

XT GAME

We are looking to expand into gaming, and the creation of XT GAME is the first step on this path.

You can WIN BY playing.

While you're doing something fun, you can be generating profits.

We will have active players and competitions.

NFT

Usefulness:

NFTs focus on the idea of "passive lifetime benefits," a model that provides multiple streams of rewards and utility to the holder.

One of the benefits will be used in the game since with them you will be able to have an easier time generating winnings.

In addition, being the owner of one will have "privileges" in the near future.

LOTTERY

We will create a lottery game where every week you will have a chance to win.

The value of 1 dollar per ticket will be put on sale and the proceeds will be raffled at the end of the week or month.

You will have the possibility to purchase the number of tickets you want with more chances of winning.

Perhaps NFTs are valid here as well
